J.P Morgan Chase and Co.

June - August 2022

Wilmington, Delaware

Develop software solutions to support corporate functions within J.P Morgan Chase. Working as a full-time intern on a team of software engineers, I developed an automated graphical report used by multiple teams of financial analysts. The application I developed increased efficiency by approximately 1.5 full time employees per month.

Worked with **Grafana**, **Java**, **Springboot**, and **Oracle SQL** to make commits to existing code bases using **Jira**. Overall developed proficiency in **Java Spring Boot**, **Apache Airflow/Python**, **Kubernetes**, and **SQL**.

Code Differently

October 2021 - August 2022

Wilmington, Delaware

Work with software professionals to develop personal skills. Learned **Agile** frameworks, **Java**, **Android Studio**, **SQL**, **React**, **HTML**, **CSS**, **JavaScript**, and presentation skills.

Delaware Technical Community College

September 2022 - December 2023

Wilmington, Delaware

Working towards an Associates in Applied Science to eventually transfer to University of Delaware for a Bachelors of Science in Computer Science.

Certifications

Oracle Certified Foundations Associate, Java Certified in Java Fundamentals

Skills

Java, Spring Boot Framework, JavaFX

JavaScript, Node.js, React.js

HTML, CSS

Python, Apache Airflow

SQL, MySQL, Grafana

C++

Git, BitBucket
